

106 PRIVATE USE OF COUNCIL VEHICLES – FUEL CHARGE

That the Council adopt a charge out rate for fuel used for private use of Council vehicles that uses the fuel consumption rates for vehicles published on 'The Green Vehicle Guide' website. Fuel charges would be calculated using these consumption rates discounted by 10% to recognize the lower fuel consumption in rural driving conditions and by a further 5% to reflect Council's practice of providing fuel at a discounted rate. Fuel prices used for the actual calculations will be set on a monthly basis using the fuel price for card supplies for the first week of the month.
